**MTA: Introduction to Programming Using HTML and CSS - Certified 2021** Microsoft

### EDUCATION

Computer Systems Engineering

**Universidad Tecnologica de México**

2021

### LANGUAGE

English

### PROFILE

Since 2012, I have been immersed in the IT industry, specializing in supply chain solutions for healthcare and retail. With a strong passion for software development using React and agile methodologies, I thrive in global environments by coordinating diverse teams and fostering collaborative, inclusive atmospheres. A natural multi-tasker, I analyze complex problems to deliver optimal solutions, all while crafting impactful digital experiences.

### WORK EXPERIENCE

#### FrontEnd Developer

UpWork/Freelancer/Contractor

2022 to

- We successfully redesigned several applications for various clients, collaborating closely with product owners, the UX team, and technical architects to align design with functionality while adhering to the best coding practices.
- The UX team and I worked together to establish an optimized workflow using Figma, ensuring the best possible user experience.
- Our development efforts included customizing packaged applications and creating custom applications and other utilities.
- Applied SEO Principles in order to improve optimized contend.
- Used AWS to develop and deliver applications.

#### Web UI Developer

Globant

2022

- Agile Methodology was used to achieve the best possible result while minimizing risks, using tools such as Jira and Trello that resulted in continuous, fluid, and clear communication in the team.
- Researched different approaches to new components ( Punch Notifications ).
- Prioritize work with my co-workers, aligning with the rebranding (styles & functionality).
- Create and led new components for the new functionalities(rebranding), and was able to work closely with the backend team, in order to add a new property in the service for validation.
- Collab with UI/UX Team using Figma in the creation/update of components in the rebranding process.

#### FrontEnd Developer

Accenture

2021-2021

- Developed applications using modern frameworks such as technologies such as React, Angular, JS, Ionic, and Form.IO, delivering robust, high-maintainable, and customizable solutions.
- Worked with AWS using EC2, S3, RDS and Lambda.
- Prioritized the client's needs and interacted with customers delivering outstanding customer service.
- Took Leadership in the development of an internal website for HR, using React and MaterialUI.
- Led the first certification program in the area for FrontEnd, creating study guides and coding challenges using HTML, JavaScript, and CSS.
- Took leadership creating a training path for Microsoft Technology Associate (MTA):
  - HTML5 Application Development Fundamentals
  - Introduction to Programming Using HTML and CSS.
  - Introduction to Programming Using Javascript
